(54) DEWATERING MACHINE FOR UMBRELLA

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a dewatering machine for umbrellas in a simple structure and at a low cost without using electric power.

SOLUTION: An umbrella on which rain drops are deposited are beaten against a first buffer member 15 or against a second buffer member 17 for a first dewatering means 8 to tap off rain drops deposited on the umbrella. Then, the umbrella is inserted in a second dewatering means 10 to squeeze rain water residing on the outer surface of the umbrella with water absorbing members 34, 34 and a water absorbing roller 40. These series of operation is manually done.

LEGAL STATUS

[Date of request for examination] 22.12.1999

[Date of sending the examiner's decision of rejection] 24.04.2001

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3242074

[Date of registration] 19.10.2001

[Number of appeal against examiner's decision of rejection] 2001-08626
